GORSKI G-2000SS DIVING HELMET

G-2000SS: Taking Safe Diving into the 21st Century

The *G-2000SS* has been developed by a professional diver, who searched constantly for the ideal commercial diving helmet. Its stainless steel, light weight investment-casting makes the *G-2000SS* a one of a kind, space age technology piece of equipment. There is nothing else out there that can compare.

A few advantages of the G-2000SS Diving Helmet:

- ❑ Its **all-metal construction** makes the *G-2000SS* easy to adapt and attach auxiliary equipment, such as lights, camera, etc.
- ❑ The **front port (window)** is made of the **strongest machinable Lexan®** material for extra safety.
- ❑ The *G-2000SS* has a **unique retaining system** to lock the neck dam in place as well as securing the helmet on the diver's neck.
- ❑ The **Poseidon Cyclon 5000 2nd stage**, the best balanced, easiest breathing regulator in the industry today, has been incorporated to fit within the helmet, where it is fully protected.
- ❑ The design of the *G-2000SS* does **not require a side block**, which was replaced in stead with a **free flow valve in line with the 2nd stage regulator**.
- ❑ The **back mounted manifold** contains to **check valve assemblies**, one for the main supply and the other for the reserve backup air or gas supply.
- ❑ The *G-2000SS* is a **perfectly balanced** helmet.
- ❑ The *G-2000SS* weighs in at **13,5 kg/ 29 lbs.**
- ❑ The *G-2000SS* is **uncomplicated and of rugged construction** which make it **easy to maintain**.
- ❑ **All valves, regulators, parts, etc. are industry standard brand names.**

During recent tests at the Navy Experimental Diving Unit (NEDU), Panama City, Florida, the G-2000SS achieved outstanding results regarding resistive effort, CO₂ and dead space values.
