

# Rubber Drysuits

## 1000g RE Thor Drysuit

Thor drysuit is manufactured from a vulcanised polymer created from a mix of high-grade rubber and EPDM. Vulcanised laminated polymers are carried on a multidirectional 4-way-stretch knitted polyester.

## 1600g RE Thor Drysuit

Thor drysuit is manufactured from a vulcanised polymer created from a mix of high-grade rubber and EPDM. Vulcanised laminated polymers are carried on a multidirectional 4-way-stretch knitted polyester.

## VIKING PRO

Designed for flexibility and comfort in a wide range of applications. Vulcanised seams allow for peace of mind when diving under all situations. The VIKING PRO is easy to clean and repair which helps to minimise downtime.

## VIKING PROTECH II

A flexible dry suit designed for maximum comfort in a wide range of applications, particularly suited for military use. Rear entry design. Vulcanised seams allow for peace of mind when diving under all situations.

## VIKING HD

The VIKING HD is considered to be the industry standard for commercial diving worldwide. The suit material is as it suggests, heavy duty, built to withstand the rigours of diving in a harsh working environment.

## VIKING HDS

The VIKING HDS sets the standard amongst vulcanised rubber drysuits. Made from NITECS, a material developed by Ansell Protective Solutions with a US patent applied.

### **VIKING DIVERS DRESS**

The VIKING DIVERS DRESS is based on the VIKING HD, and is manufactured with a touch of nostalgia for those divers who continue to dive using traditional helmets, like the Siebe Gorman 12 bolt.
